

URGENT LIFE ALERT, Round 2: Contact YOUR legislator today!

The time has come again for urgent action. **Your legislator needs a personal touch from you NOW.**

The life-saving “Heartbeat Bill” that the Iowa Senate passed last week has just been moved to a House committee.

But unless a majority of Iowa’s representatives can be moved to protect the life of unborn babies ... the bill will likely die in its House committee.

We can’t let that happen!

And what’s more, **there’s only ONE WEEK left for the Iowa House to act on this bill.**

***Click here for a convenient tool that will identify and email
YOUR representative in one, easy step!***

Iowa’s “Heartbeat” legislation would ban abortions in Iowa after the baby’s heartbeat can be detected. It’s no stretch to believe this law could save as many as 3,000 or more babies and their mothers from abortion every year!

But while the Senate passed a “Heartbeat” bill last week, Iowa’s House of Representatives still has too many elected representatives sitting on the fence. **Your representative may be one of them.**

That’s why we’re urgently asking you to click the link below. Encourage YOUR elected representative to take a stand for Iowa’s babies before it’s too late!

Click here to email YOUR representative now.
